Applications
Optimization algorithms
LVM
MGNM
Position optimization:
Multipath distance detection and mitigation
MDDM
Determination of an approximate (start) position
Localization Algorithms
Solving of multivariant linear and non-linear equation systems (LESs & N-LESs)
Solve mulivariant LESs & N-LESs
Optimization & Curve Fitting
Matrix inverse computation
Pseudo-Inverse
Matrix decompositions
SVD
Householder
Givens
Matrix, vector, and algebraic operations
Utils
Matrix
Vector
